

2.4GHz 24 dBi Grid Subscriber Antenna

This 24dBi Grid Antenna is made of Magnesium Alloy, which is superior to anodized aluminum and weighs 33% less. It has a low wind resistance and features a die-cast manufacturing process that provides unmatched uniformity resulting in consistency high-performance from every antenna.

Easy to install for either horizontal or vertical polarization.

Electrical	
Frequency:	2400 ~ 2500 MHz
3 dB Beam Width:	7.5°
Gain:	24 dBi
Front to Back Ratio:	>30 dB
Polarization:	Horizontal or Vertical
VSWR:	≤ 1.5
Power:	50 W
Impedance:	50 Ohm
Wind Loading:	87 mph (140 km/h)
Mechanical	
Connector:	N Type Female
Size:	39.37" x 23.42" x 7.8"
Weight:	6.51 lbs
Material:	Cast Magnesium Alloy
Mounting:	Included: Pole Mount
Operating Temperature:	-40°C to 65°C
Additional Features:	Low Wind Resistance
